

<b>Report title</b> Indicator	<b>Sectoral/Fishery Assessment or Ingredient Manufacturer Assessment Summary Report, v1.0</b> 2.2.21
<b>Instructions</b>	This template is intended for reporting a summary of Due Diligence pathways 2 (Sectoral/Fishery assessment) or 3 (Ingredient manufacturer assessment) under Principle 2. Reporting is at a LAC level and on an annual basis. The LAC should select the pathway used and the type of assessment (whether ingredient manufacturer or plant/primary raw material). The LAC enters the date the assessment was conducted. The LAC enters the primary raw material covered (if applicable). If primary raw material is not used, the LAC enters the common name and Latin name. The LAC enters the risk factor assessed. The LAC enters the country of location (ingredient manufacturer) or production (plant primary raw material). For marine primary raw material, Fishery is selected as the Country of location. The LAC enters the FAO fishing area for the marine primary raw material. The LAC enters a summary description of the risk assessment (max 1000 characters). The LAC enters links to any publicly available resources used. The LAC enters a summary description of any measures taken to ensure low risk (for ingredient manufacturer assessment only) (max 1000 characters). The LAC enters a summary description of the implemented monitoring program to ensure the effectiveness of any measure taken to ensure low risk (if applicable) and b) monitor the risk factors, to ensure the risk level determined remains valid (max 1000 characters). A new row should be added for each assessment and for each risk factor assessed (if more than one).

Table 1: Summary of Due Diligence Pathways 2 and 3 (cont.)	Pathway used	Date of Due Diligence Assessment (yyyy-mm-dd)	Primary Raw Material (Common name (Latin name))	Risk Factor Assessed	Country of Location/Production (Select Fishery / Marine primary raw material)	FAO Fishing area (Marine primary raw material)	Summary description of risk assessment (max 1000 characters)	Links to any publicly available resources used	Summary description of any measures taken to ensure low risk effectiveness (max 1000 characters)	Summary description of implemented monitoring program (max 1000 characters)
Pathway 2 Sectoral/Fishery assessment	Ingredient Manufacturer	2020-03-16	European pichard ( <i>Dardina picharda</i> )/Scorpaenidae	Legal	Morocco	FAO 34	The supplier currently holds MarineTrust Version 2 certification, which is considered valid under the official MarineTrust transition framework. Version 3 of the MarineTrust standard was approved on 25 October 2020 and became mandatory for new applicants from 1 May 2021. Existing V2-certified facilities were granted an official one-year transition period, during which V2 certification remains legally recognized. Furthermore, MarineTrust has announced that from 1 May 2021 onward, all audits will be conducted exclusively against Version 3, and extensive transition guidance has been published to support certificate holders through the update. Within the CBEL Group,	<ul style="list-style-type: none"> <li>ASC Feed Standard Country Risk Score Card V.1.2</li> <li>ASC Feed Standard Country Score Cards - Methodology and Rationale, Version 1.2</li> <li><a href="https://sustainablefish.org/feed-standards/marinetrust/">https://sustainablefish.org/feed-standards/marinetrust/</a></li> <li>Maine Trust   SeaFish</li> <li>Version 3 of the MarineTrust Factory Standard   MarineTrust</li> <li>Proc 17 Eshallowfishing at analysis</li> <li>Flow chart CBEL 8</li> <li>Manual HACCP-V2D</li> <li>CBEL 2 - UMACC GMP/PSA - Final Certificate</li> </ul>	<ul style="list-style-type: none"> <li>ASC Feed Standard Country Risk Score Card V.1.2</li> <li>ASC Feed Standard Country Score Cards - Methodology and Rationale, Version 1.2</li> <li><a href="https://sustainablefish.org/feed-standards/marinetrust/">https://sustainablefish.org/feed-standards/marinetrust/</a></li> <li>Maine Trust   SeaFish</li> <li>Version 3 of the MarineTrust Factory Standard   MarineTrust</li> <li>Proc 17 Eshallowfishing at analysis</li> <li>Flow chart CBEL 8</li> <li>Manual HACCP-V2D</li> <li>CBEL 2 - UMACC GMP/PSA - Final Certificate</li> </ul>	Given these circumstances, the supplier's current V2 certification is still legally acceptable during the transition period and does not constitute a breach of regulatory or certification obligations. For this reason, the supplier is considered to have sufficient compliance mechanisms in place, and the situation is assessed as low legal risk.
Pathway 2 Sectoral/Fishery assessment	Ingredient Manufacturer	2020-03-16	European pichard ( <i>Dardina picharda</i> )/Scorpaenidae	Social	Morocco	FAO 34	The company's social risk level is assessed as low. Morocco, the supplier country, ratified the ILO Work in Fishing Convention, C188 in 2011, ensuring legally binding provisions for workers in the fisheries sector. In addition, Morocco's national labor legislation (Law 65-09) regulates minimum wage, working hours, registered employees, and basic labor rights, providing a legal framework that reduces social risk exposure. Since the supplier operates under MarineTrust certification, it undergoes at least one oversight audit per year, during which ASC Feed social criteria are evaluated, including the ILO Core Conventions prohibition of forced labor (278, C105), prohibited child labor	<ul style="list-style-type: none"> <li>ASC Feed Standard Country Risk Score Card V.1.2</li> <li>ASC Feed Standard Country Score Cards - Methodology and Rationale, Version 1.2</li> <li><a href="https://sustainablefish.org/feed-standards/marinetrust/">https://sustainablefish.org/feed-standards/marinetrust/</a></li> <li>Maine Trust   SeaFish</li> <li>Version 3 of the MarineTrust Factory Standard   MarineTrust</li> <li>Proc 17 Eshallowfishing at analysis</li> <li>Flow chart CBEL 8</li> <li>Manual HACCP-V2D</li> <li>CBEL 2 - UMACC GMP/PSA - Final Certificate</li> </ul>	<ul style="list-style-type: none"> <li>ASC Feed Standard Country Risk Score Card V.1.2</li> <li>ASC Feed Standard Country Score Cards - Methodology and Rationale, Version 1.2</li> <li><a href="https://sustainablefish.org/feed-standards/marinetrust/">https://sustainablefish.org/feed-standards/marinetrust/</a></li> <li>Maine Trust   SeaFish</li> <li>Version 3 of the MarineTrust Factory Standard   MarineTrust</li> <li>Proc 17 Eshallowfishing at analysis</li> <li>Flow chart CBEL 8</li> <li>Manual HACCP-V2D</li> <li>CBEL 2 - UMACC GMP/PSA - Final Certificate</li> </ul>	In line with Bimkar Marine ingredients Facility Statement and Code of Conduct, the company does not employ with certified suppliers. Given the supplier's certification status, audit oversight, commitment to transition toward V3, and alignment with national and international labor standards, the supplier is consequently assessed as low social risk.
Pathway 2 Sectoral/Fishery assessment	Ingredient Manufacturer	2020-03-16	European pichard ( <i>Dardina picharda</i> )/Scorpaenidae	Environmental	Morocco	FAO 34	The company is assessed as having low environmental risk, based on consistent evidence showing that environmental commitments, process-related impacts, and facility-level environmental controls are effectively managed and independently verified. The supplier implements a documented environmental monitoring system that includes routine analysis of dissolved PCBs, heavy metals (Pb, Cd, Hg, Ag, pesticides, hydrocarbons: EOC-C&C and PAHs), as demonstrated in the Sampling and Analysis Procedure PB-17. This procedure further confirms continuous water quality monitoring (chlorine testing, periodic air quality sampling (metabolic loads), and/or	<ul style="list-style-type: none"> <li>ASC Feed Standard Country Risk Score Card V.1.2</li> <li>ASC Feed Standard Country Score Cards - Methodology and Rationale, Version 1.2</li> <li><a href="https://sustainablefish.org/feed-standards/marinetrust/">https://sustainablefish.org/feed-standards/marinetrust/</a></li> <li>Maine Trust   SeaFish</li> <li>Version 3 of the MarineTrust Factory Standard   MarineTrust</li> <li>Proc 17 Eshallowfishing at analysis</li> <li>Flow chart CBEL 8</li> <li>Manual HACCP-V2D</li> <li>CBEL 2 - UMACC GMP/PSA - Final Certificate</li> </ul>	<ul style="list-style-type: none"> <li>ASC Feed Standard Country Risk Score Card V.1.2</li> <li>ASC Feed Standard Country Score Cards - Methodology and Rationale, Version 1.2</li> <li><a href="https://sustainablefish.org/feed-standards/marinetrust/">https://sustainablefish.org/feed-standards/marinetrust/</a></li> <li>Maine Trust   SeaFish</li> <li>Version 3 of the MarineTrust Factory Standard   MarineTrust</li> <li>Proc 17 Eshallowfishing at analysis</li> <li>Flow chart CBEL 8</li> <li>Manual HACCP-V2D</li> <li>CBEL 2 - UMACC GMP/PSA - Final Certificate</li> </ul>	Environmental impacts associated with the production of feed ingredients are managed through a robust system of controls, including the use of Best Management Practices (BMPs) and adherence to applicable environmental regulations. The supplier's environmental management system is documented and independently verified, ensuring that environmental controls are effectively managed and independently verified. The supplier implements a documented environmental monitoring system that includes routine analysis of dissolved PCBs, heavy metals (Pb, Cd, Hg, Ag, pesticides, hydrocarbons: EOC-C&C and PAHs), as demonstrated in the Sampling and Analysis Procedure PB-17. This procedure further confirms continuous water quality monitoring (chlorine testing, periodic air quality sampling (metabolic loads), and/or
